Technical Information

- Wisenet Device Manager update
- Advanced configuration on SSM Appliance Array
- Lens Initialization setting on focus of PTZ camera

Latest F/W Information

Wisenet Device Manager update

Info. Type Quality Settings Repair  S/W Etc

1. Model

- Wisenet Device Manager v2.6.5 updates (v2.5.2 -> **v2.6.5**)

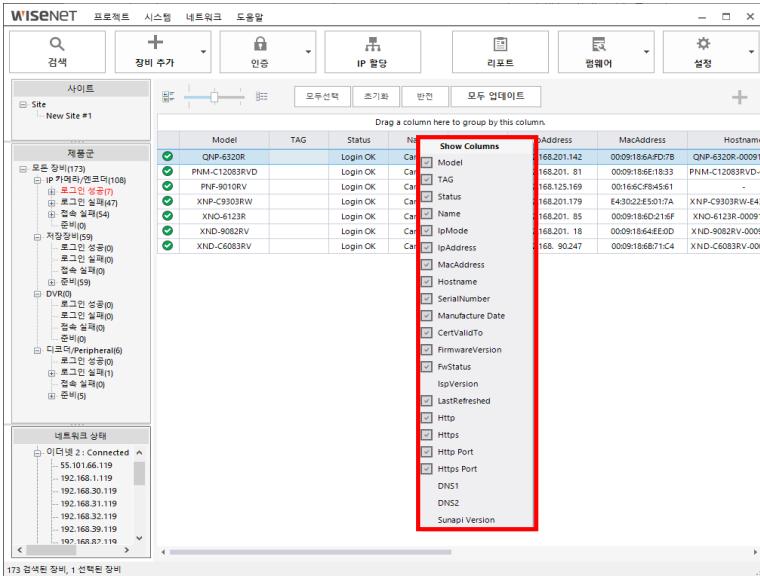

※ Downloadable at Hanwhavision.com

Home > Support > Online Tool > PC Installation Tool > Wisenet Device Manager

2. Major improvement points

1) Modified setting method of column main list

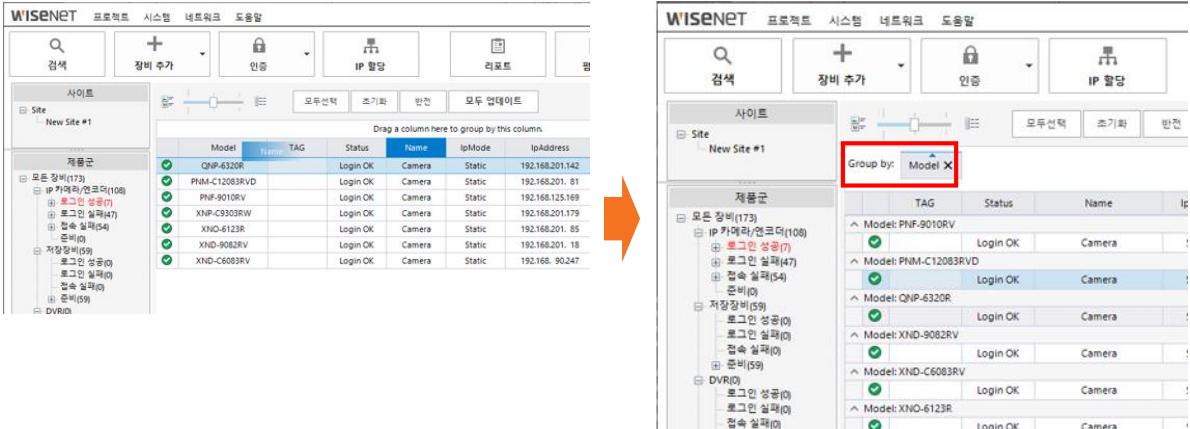

- . Changed Column setting method, Drag > Drop

| Model | Address | MacAddress | Hostname |
|---------------|-------------|---------------|-----------------|
| QNP-6320R | 168.201.142 | 0009186A9D7D | QNP-6320R-00091 |
| PNN-C12083RVD | 168.201.81 | 0009186E1833 | PNN-C12083RVD-C |
| PNF-9010RV | 168.125.169 | 00166C784561 | |
| XNP-C9303RW | 168.201.179 | E430222E5017A | XNP-C9303RW-E43 |
| XNO-6123R | 168.201.85 | 0009186D016F | XNO-6123R-00091 |
| XND-9082RV | 168.201.18 | 000918646EE0D | XND-9082RV-0009 |
| XND-C6083RV | 168.90.247 | 0009186871C4 | XND-C6083RV-000 |

2) Main list grouping

- . Added main list grouping function

| Model | Name | TAG | Status | Name | IpMode | IpAddress |
|---------------|------|-----|----------|--------|--------|-----------------|
| QNP-6320R | | | Login OK | Camera | Static | 192.168.201.142 |
| PNN-C12083RVD | | | Login OK | Camera | Static | 192.168.201.81 |
| PNF-9010RV | | | Login OK | Camera | Static | 192.168.125.169 |
| XNP-C9303RW | | | Login OK | Camera | Static | 192.168.201.179 |
| XNO-6123R | | | Login OK | Camera | Static | 192.168.201.85 |
| XND-9082RV | | | Login OK | Camera | Static | 192.168.90.247 |
| XND-C6083RV | | | Login OK | Camera | Static | 192.168.90.247 |

Technical Information

Wisenet Device Manager update

Info. Type Quality Settings Repair S/W Etc

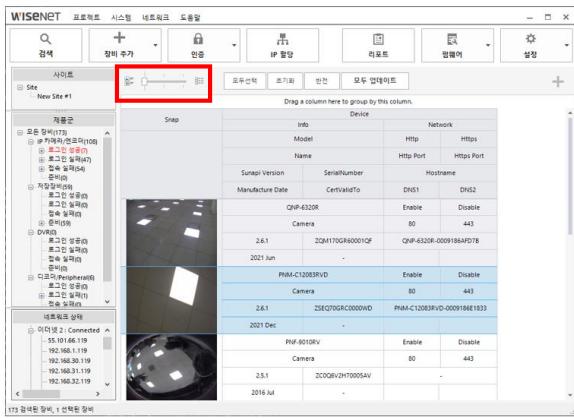

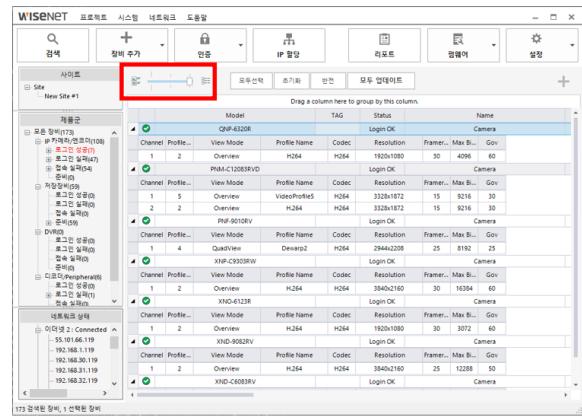

3) Changed viewType function

- . Offers 3 ViewTypes(Size)
- . Controller is set at middle as default meaning medium size

Left : Large view with Screen Shot displaying basic information

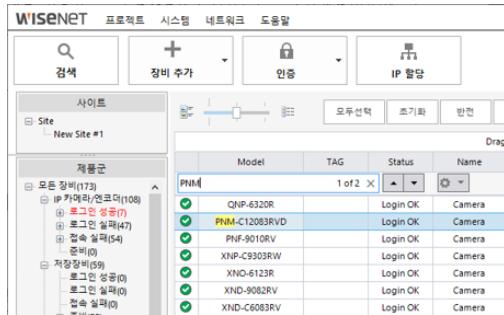

Middle : Middle view, set as default, displaying all information

Right : Small view displaying default profile information of channels at each camera

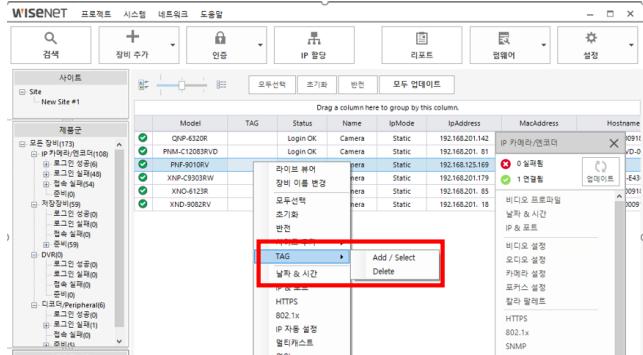

4) Search function

- . Ctrl + F or click on list search to find information of main list

5) Tagging

- . Able to add tagging at each device, and can be found under the Column > Tag section

Advanced configuration on SSM Appliance Array

Info. Type Quality Settings Repair S/W Etc

1. Model

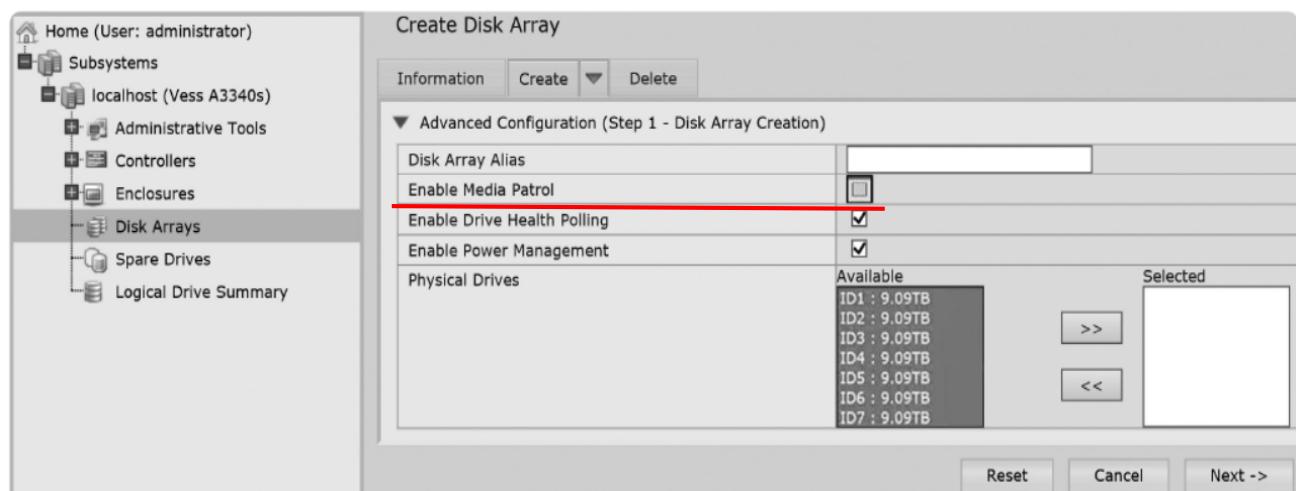

- PRP-5000H16, PRP-4000H8

2. Purpose

- When setting up a disk array, it is recommended to use 'Advanced Configuration' to create logical drives for system optimization

3. Advanced Configuration function (Refer to Quick Guide pg.20)

- Disk Arrays → Advanced configuration → Undo 'Enable Media Patrol' → Select number of physical drives → Select RAID level → Submit → Check Array content → Logical drive configuration

<Undo 'Enable Media Patrol'>

- When enabling Media Patrol, Disk check performs at every 10sec
- Disk Check continuously consumes memory, thus system cannot offer its optimal performance
- Recommended not to exceed 8 physical drivers per each logical drive

4. Comparison of configuration

| Configuration | Explanation | Advantage | Disadvantage |
|---------------|--|---|--|
| Automatic | Automatic configuration based on mounting HDD and selection options | Configuration is easy and fast | Does not offer optimal saving performance |
| Express | Automatic configuration based on mounting HDD, number of logical drives requested, and selection options | | |
| Advanced | Configure logical drive manually by user selection | Able to create an optimal logical drive | Requires a separate manual setup procedure |

Lens Initialization setting on focus of PTZ camera

Info. Type Quality Settings Repair S/W Etc

1. Model

- All network PTZ cameras with automatic lens initialization function

2. Purpose

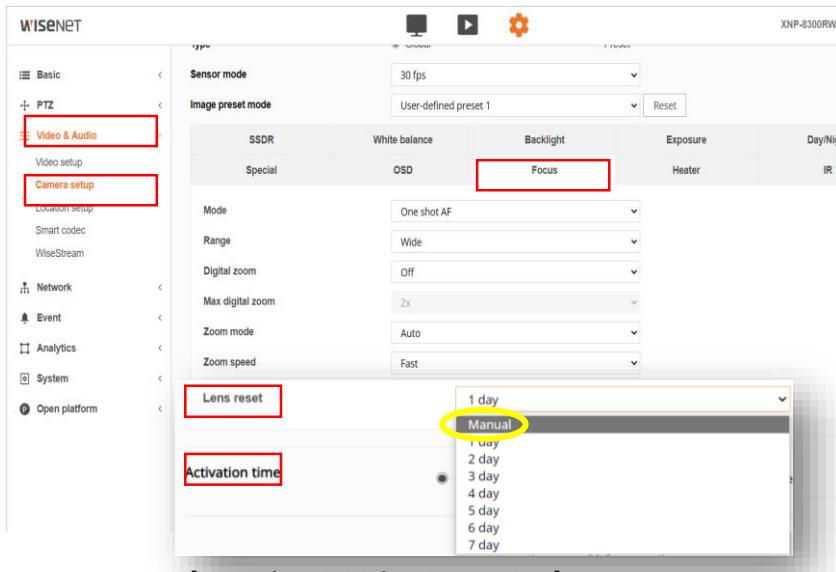

- The default value of the focus-lens initialization is 1day. Thus, the setting value should be changed as per user scenario if necessary

3. When to use automatic lens initialization on focus

- Focus blur may occur if the camera monitors complex scenes or is installed in an environment exposed to vibration. This function automatically optimizes focus at regular intervals

4. Able/Disable & working scenario

- Video & Audio > Camera setting > Focus > Lens initialization
 - > Select 1day~7day(Able) / Select manual(Disable)
 - Able: Lens initialization performs at regular intervals starting from when camera was powered up
 - Disable: Select 'Manual' to perform lens initialization once at user need
- Working scenario: Camera Tilt down > Zoom in > Focus adjust > Move back to the position before lens initialization

[Focus-lens initialization setting]

[Max. Zoom-in at focus initialization]
