Technology Information

- Instructions on how to repair thermal imaging cameras by their fault locations
- Information on the Wisenet SSM v2.17 update
- Information on the additional Safety Wire installation option for 5-CH Multi-Cameras
- Information on the NTP server synchronization specification for NVR & N/W Cameras

Latest Firmware Information

Instructions on how to repair thermal imaging cameras by their fault locations

Info. Type

 Quality Settings Repair S/W Etc

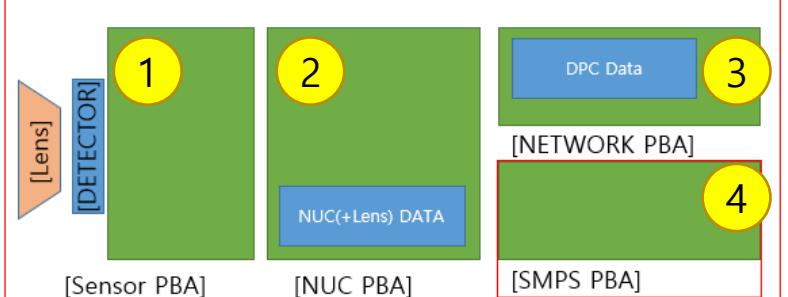

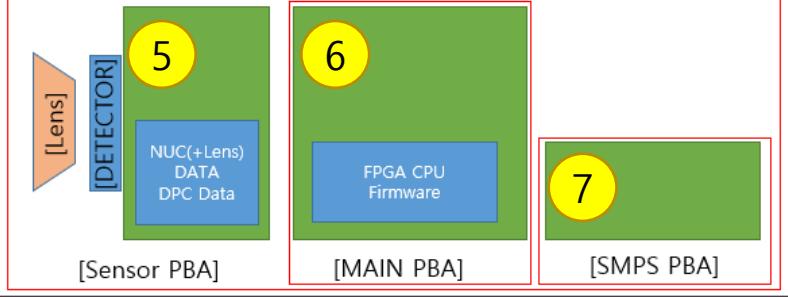

● Target Models

- VGA Thermal : TNO-4030T(R)/4040T(R)/4041T(R)/4050T/4051T/L4030T/L4030TR
- QVGA Thermal : TNO-3010T/3020T/3030T/L3030T/3040T/3050T
- Radiometric AI : TNO-3010TRA/C3012TRA/C3020TRA/C3022TRA/C3030TRA/C3032TRA
- QVGA Bi-spectrum : TNM-3620TDY/C3620TDR(Y)/C3622TDR/ANB-3620T
- VGA Bi-spectrum : TNM-C4940TD(R)/C4950TD/C4960TD/C4942TDR

● Purpose

- To provide a guideline on replacement by combining parts with sensor-specific information when repairing thermal imaging camera parts.

sensor-specific information ?
 NUC Data [Lens + Sensor Calibration Data]
 + DPC Data [Defective pixel information]

Type	Thermal Imaging Module Structure			
VGA Thermal		[Sensor PBA]	[NUC PBA]	[SMPS PBA]
QVGA Thermal/ Radiometric AI/ QVGA Bi-spectrum/ VGA Bi-spectrum		[Sensor PBA]	[MAIN PBA]	[SMPS PBA]

No	Parts Name	Single Replacement	Remark
①	Sensor PBA	Impossible	Replace the upper Ass'y set (①+②+③+ [Lens]) + sensor-specific information
②	NUC PBA		
③	NETWORK PBA		
④	SMPS PBA	Possible	
⑤	Sensor PBA	Impossible	Replace the upper Ass'y set (⑤ + [Lens]) + sensor-specific information
⑥	Main PBA	Possible	
⑦	SMPS PBA	Possible	

Information on the Wisenet SSM v2.17 update

Info. Type

 Quality Settings Repair S/W Etc

● Target Models

- All XRP product lines(XRP-4010B2/4110B2/4210B4/4310DB4)

● Purpose

- Update SW version from SSM 2.16.01 to [2.17.00](#)

● Update Highlights

Categories	Details
New Features	<ul style="list-style-type: none"> . Support for IP speakers on maps . Support for 2-player rule <ul style="list-style-type: none"> - A setting function to require approval from the other user when performing a playback/backup operation. . Adding 6 SSW-ME licenses for Middle East appliances . Support for Windows Server IoT 2022 (Standard)
Improvements	<ul style="list-style-type: none"> . Support for dynamic events in Federation. . Support for modifying or deleting the default Admin account. . Support for resizing the event list window in the Logistics tab. . Adding information about cameras and servers to the device settings report. . Support for adding keyboard shortcuts. . Displaying a warning message when restoring other server settings. . Displaying NVR recording profile settings. . Support for resizing the top window of the SSM console.
Bug Fixes	<ul style="list-style-type: none"> . Fixed the problem of dynamic event not being forwarded after restoring the federation connection state . Fixed the SSM server multicast transmission error . Made it possible to support TRUEN Encoder (TCS-410) integration

● Effective From : Oct. 2, 2024

Information on the additional Safety Wire installation option for 5-Channel Multi-Cameras

Info. Type

 Quality Settings Repair S/W Etc

● Target Model

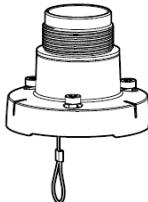

- PNM-C34404RQPZ

● Purpose

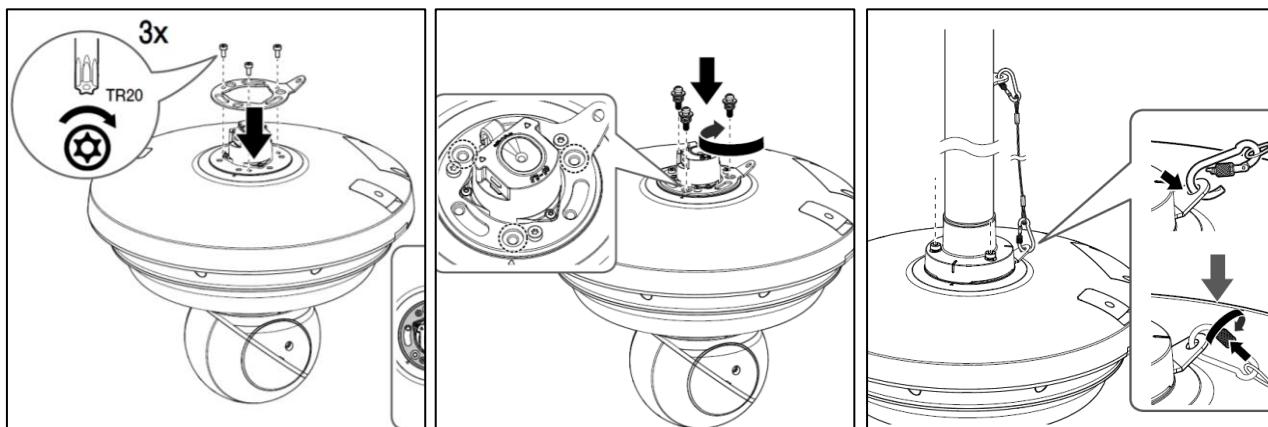

- Adding the option to secure the camera to an external pole for camera drop prevention

● Changes

- Products before Nov. 2024: The safety wire can be used after replacing the 4 accessories shown below.
- Products after Nov. 2024: The 4 accessories below are provided as standard.

Hanging Mount	Bracket	Screw	Safety Wire
			

● How to install

- Effective From : Nov. 11, 2024

Information on the NTP server synchronization specification for NVR & N/W Cameras

Info. Type

Quality Settings Repair S/W Etc

● Target Models

- All our NVR & N/W Camera products currently running

● Purpose

- To Describes the NTP server synchronization specification

● Information about the NTP server

- Default NTP Server IP : time.bora.net (203.248.240.140)

※ The IP address(203.248.240.140) indicates a universal NTP server for Linux & Windows operating systems.

● Sync Period

- NTP synchronization is performed every hour after setting
- If the NTP server does not respond: Reconnection will be attempted to synchronize with the NTP server every hour.

● When there is a time difference between the NVR and the NTP server

Time Difference	Sync	Remarks
0-1 second	No Syncing	NTP synchronization does not work.
1-5 seconds	Syncing	The RTC and system time are changed to the NTP server time.
5 seconds to 60 minutes		After a system pause occurs, the RTC and system time are changed to the NTP server time (overlapping intervals occur)
60 minutes or more	No Syncing	NTP synchronization does not work. ※ F/W version v2.46 and later (XRN-410S/810S/1610S, PRN-4011)

New updated firmware (2024, SEP ~ OCT)
